Vampire Sampler | for sampling liquids in the field

Transportable, hose pump for liquids, independent of mains power. Ideal for sampling from barrels, tanks, wells, water separators and sewage and purification systems.

Vampire is packed in a handy transport case with: drive unit (12 V), two re-chargeable batteries, battery charger, bottle holder, bottle LDPE 250 ml, hose pump and 5 m hose made of PE

- Easy cleaning, liquid is only in contact with the hose
- Independent of mains power with re-chargeable batteries and charger, incl. replacement battery
- Sampling directly into the original sample bottle
- Suction height up to 5 m
- Also suitable for contaminated substances or media containing particles
- Good chemical resistance
- Good delivery rate up to 2.0 l/min
