behr Kjeldahl Block Digestion Systems

K 40

Standard Kjeldahl block digestion systems behr K 8, K 12 and K 20

Block digestion systems with high grade corrosion-resistant block casing of stainless steel. With 8, 12 or 20 sample positions for standard Kjeldahl digestion vessels of volume 250 ml. High power heater and extraction hood with exhaust gas collector.

- behr one-button operation for extremely simple and fast programming
- Menu designed in language of the country
- 10 freely configurable programmes for block temperature and digestion time
- Applications storable

The supplied Windows software permits the user to transfer time/temperatures profiles, which are specifically for the application, via the RS232 interface in both directions between one or more units (K 8, K 12 and K 20) and a PC. A library with common applications is already included on the CD. Temperature data can also be transmitted from the unit to the PC via the RS232 interface while operating. The user can save them if necessary and print them out as graphics.

Stable, robust construction. Both the block casing and the rack for the digestion vessels, as well as the extraction hood, are made of acid-resistant, stainless steel. Complete systems with digestion vessels, rack and extraction hood are available.

Available with 230 V ~/50-60 Hz and 115 V~/50-60 Hz.

behr Kjeldahl block digestion systems with fully automatic lift

behr Kjeldahl block digestion systems of the L series are fitted with a fully automatic lift. This relieves the user of handling the heavy sample unit and hot chemicals. The software controls both the sample lift and the behrosog 3, thus enabling practically fully automatic digestion to be carried out.

At the end of the digestion, the lift drives up the complete unit with the framework and suction hood. After a RAM-programmed cooling/suction time, it raises the suction hood and drives it into the final position.

- The temperature profiles and starting time are freely programmable
- behr one-button operation for extremely simple and fast programming

The supplied Windows software permits the user to transfer time/temperatures profiles, which are specifically for the application, via the RS232 interface in both directions between one or more units (K 12 L, K 20 L, K 24 L and K 40 L) and a PC. A library with common applications is already included on the CD. Temperature data can also be transmitted from the unit to the PC via the RS232 interface while operating. The user can save them if necessary and print them out as graphics.

Available with 230 V ~/50-60 Hz and 115 V~/50-60 Hz.
