

Shakers, mixers and stirrers » V-32 multi vortex mixer

V-32 multi vortex mixer

Versatile multi vortex mixer for vigorous re-suspension of cell or chemical pellets in tubes up to 1.5 ml, with the facility to mix individual tubes up to 15 ml.

- Adjustable speed control: 500 to 3000 rpm
- 'Continuous' or 'touch/quick' operation
- Handles up to 32 tubes in three different sizes/combinations or a larger tube with the single platform head

Compact rugged design plus powerful motor delivering consistent performance and quiet operation – fits neatly and unobtrusively into the workspace

Easy operation – select 'continuous' or 'touch' operation and dial to control speed from 500 rpm to 3000 rpm

The 32-socket universal platform for three tubes sizes (16 x 1.5 ml, 8 x 0.5 ml, 8 x 0.2 ml) and a tip for mixing individual tubes up to 15 ml provides maximum flexibility for different applications

Low voltage cord easily fits through door gaskets, allowing use in incubators, refrigerators and workstations

Rubber suction pads hold tight to the work surface and prevent the unit from 'walking' – they also absorb vibration and prevent its transmission to the workbench

PL-1 platform with a single tube head for tubes up to 15 ml

Applications:

- Life science - performing various DNA operations — deproteinisation of DNA/protein complexes, mixing of immunostained human cells, purification of low-molecular DNA/RNA fragments in PCR-diagnostic
- Industrial - de-airing adhesive
- General - mixing and dispersion of particle suspensions
- Biopharm - solubilising powders

Shakers, mixers and stirrers » PV-1 vortex mixer

PV-1 personal vortex mixer

Extremely compact personal vortex mixer with a low profile and small footprint for gentle mixing through to vigorous re-suspension of cell or chemical pellets in up to 50 ml tubes.

- Adjustable speed control: 750 to 3000 rpm
- 'Continuous' or 'touch' operation
- For tubes up to 28.5 mm diameter, 50ml

Pressure sensitive cup accommodates tubes up to 50 ml

Reliable and extremely quiet motor produces regulated and reproducible agitation throughout the speed range

Extremely easy to operate – select either 'continuous' or 'touch' operation and turn the dial to adjust the speed from 750 rpm to 3000 rpm

Low voltage cord easily fits through incubator door gaskets

In 'touch' mode, agitation starts in response to pressure on the pressure sensitive cup

Exceptionally compact with a low profile and small footprint – fits into almost any location

Rubber suction pads hold tight to the work surface and prevent the unit from 'walking' – they also absorb vibration and prevent its transmission to the workbench

- Applications:**
- Gentle mixing through to vigorous resuspension of cells and biological and chemical liquid components
